Mathematical Biosciences

Mathematical Biosciences is abstracted or indexed in Applied Mechanics Review, Biological Abstracts, CABS/ Current Awareness in Biological Sciences, Chemical Abstracts, Current Contents, Engineering Index, Excerpta Medica, INSPEC, International Abstracts of Biological Sciences, Mathematical Reviews, and Medicus/ MEDLINE.

Volume 163

L.J.S. Allen and A.M. Burgin, Comparison of deterministic and stochastic SIS and SIR models in discrete time 1

R. Lev Bar-Or, Feedback mechanisms between T helper cells and macrophages in the determination of the immune response 35

L.G. Hanin and S.N. Vinogradov, Combinatorics of giant hexagonal bilayer hemoglobins 59

M.V. Smith and C.J. Portier, Incorporating observability thresholds of tumors into the two-stage carcinogenesis model 75

J.D. Pelletier, Are large complex ecosystems more unstable? A theoretical reassessment with predator switching 91

A. Porati and M. Ilde Granero, When the feasibility of an ecosystem is sufficient for global stability? 97

E. Baake, Erratum to 'What can and what cannot be inferred from pairwise sequence comparisons?' [Math. Biosci. 154 (1998) 1–21] 103

A. Salvador, Synergism analysis of biochemical systems. I. Conceptual framework 105

A. Salvador, Synergism analysis of biochemical systems. II. Tensor formulation and treatment of stoichiometric constraints 131

F. Nani and H.I. Freedman, A mathematical model of cancer treatment by immunotherapy 159

P.W. Nelson, J.D. Murray and A.S. Perelson, A model of HIV-1 pathogenesis that includes an intracellular delay 201
